Steps to run:

1) **Teachers needs to login by entering the email and password**
2) **If the teacher is not registered then ne needs to register himself by going to registration page where basic details like profile,name,email and passwords needs to put in a form**
3) **Once done, tecaher can visit the home page where he can mark the attendance by selecting the date, dividion**
4) **Once the attendance is marked teacher can either logout ot manage their classes**
5) **If logout then hw'll be redirected to the login page**
6) **If clicked on manage then he can add or remove students by filling the basic details of the students**

****

This is the home page from where the attendance portal starts.

There are 2 field for email and password and if the professor is not a registered member, he/she can register himself by clicking on the register here button provided.

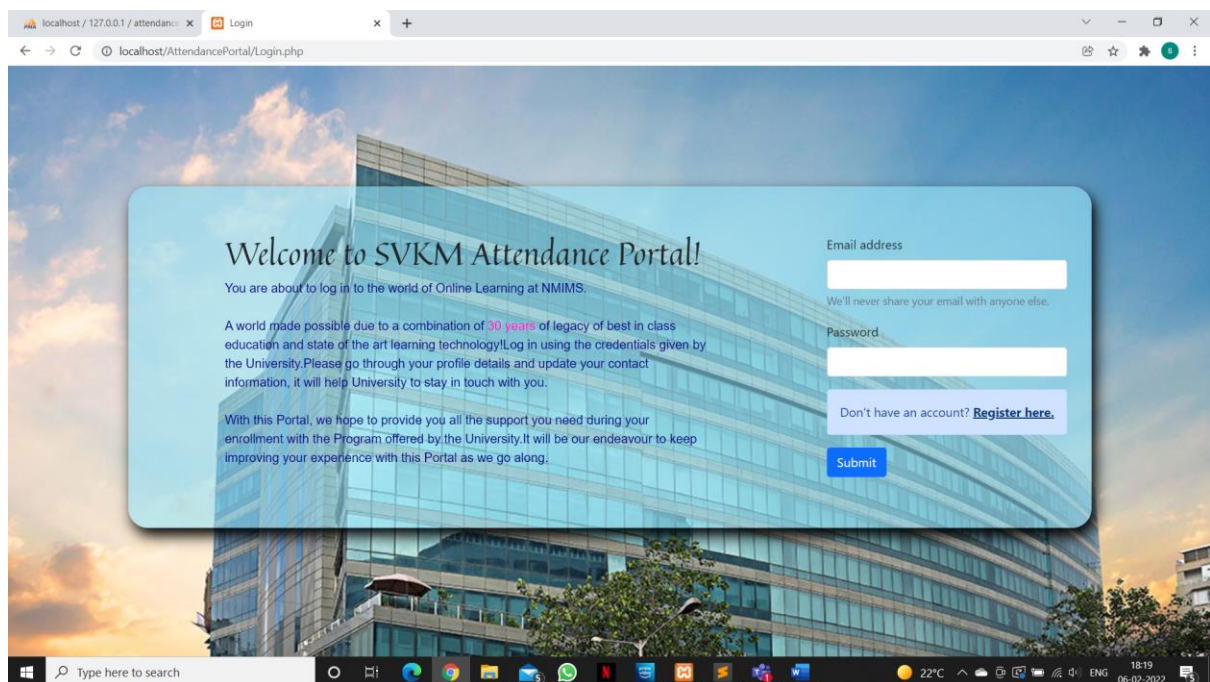

This is the page registration takes place. Teachers need to add their photo, name, email, password and check the password entered. Proper validation have been done for all the fields. Once done, they need to click on the submit button and the data gets stored in the database and the person can login any time.

Then comes the home page. Here teachers can see their profile pic uploaded, manage students and mark attendance and logout themselves. Animations have been done on the banner image. Below is a small form where teacher needs to select the date, division to mark the attendance and click on the show students button. Students of the selected division will ne shown and the teacher can mark the attendance.

This is how the students are shown in the form and toggle switch is provided to mark the attendance of the students accordingly which goes into the attendance table in the database. And the students details are shown from the students table in the database
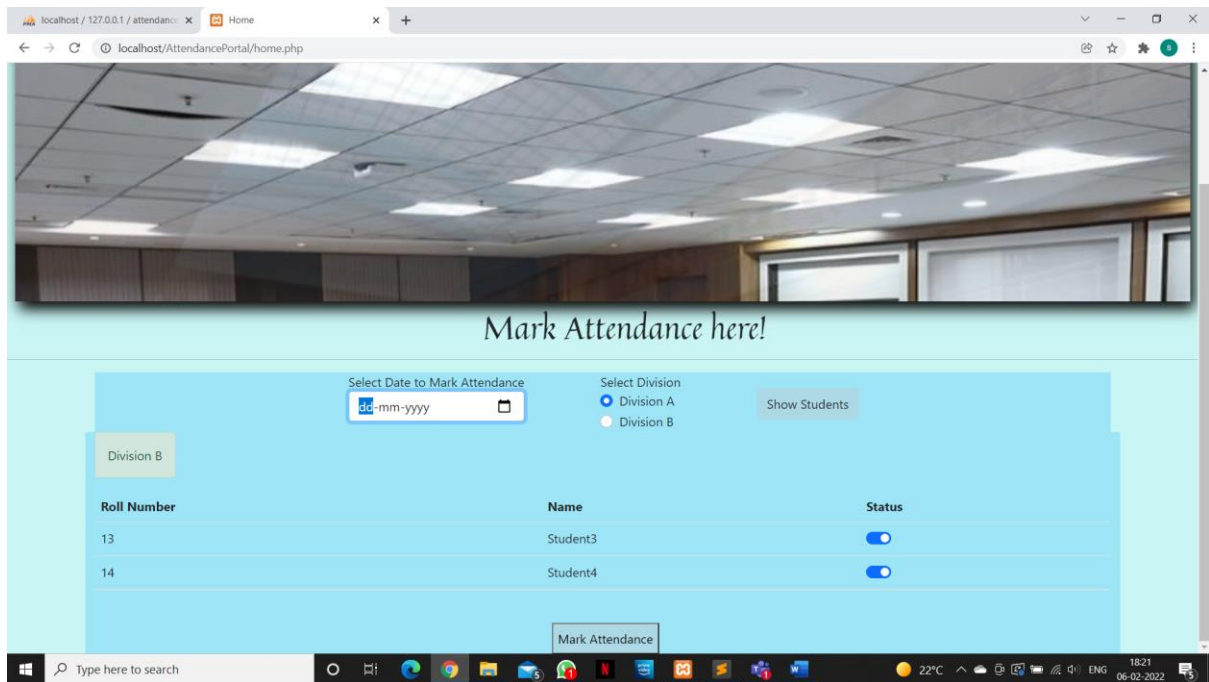

Once the attendance is parked teacher will get to know by the alert box used.
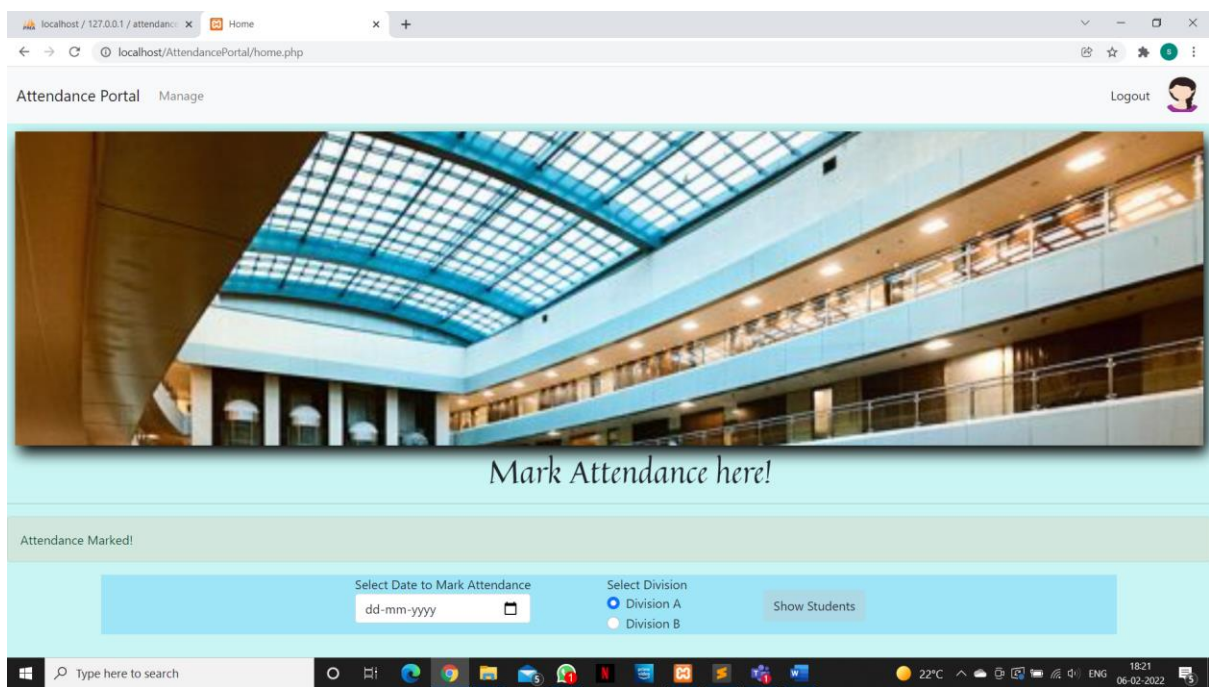

This the manage page where teachers can manage the students i.e. add or remove them from a particular class.

Once added or removed teachers get know by the alert that pops up for the the forms made.
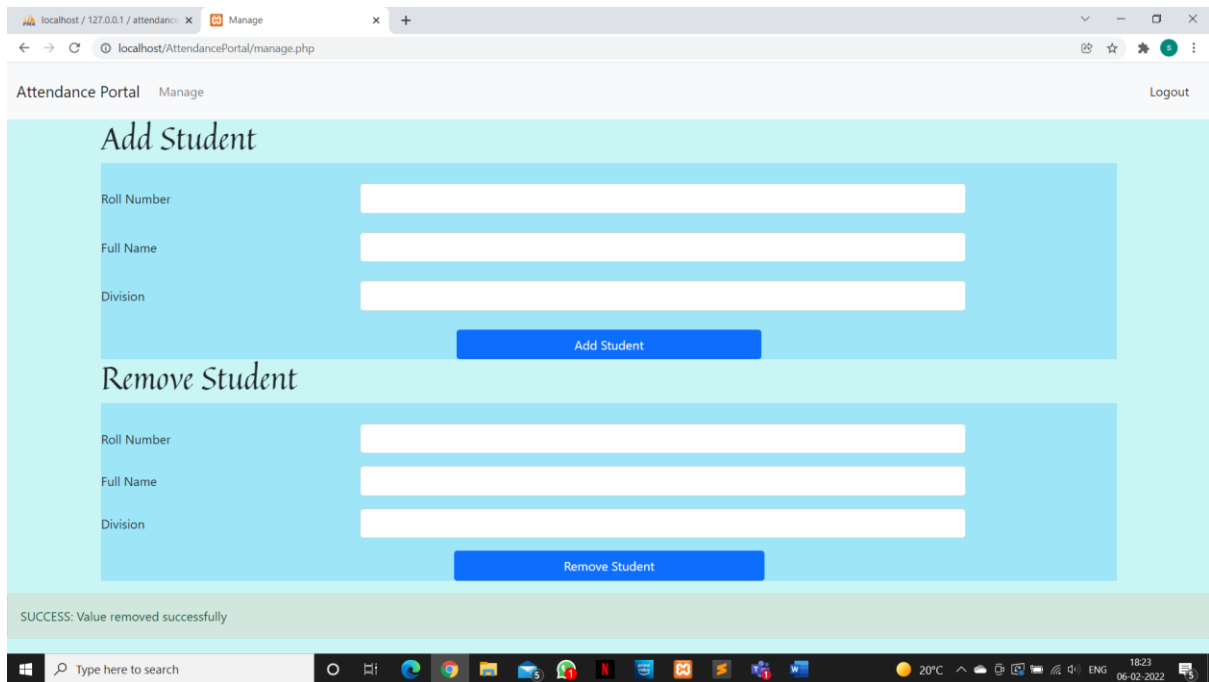

These are the screenshots of the database and the tables made with all the details.
